Other problems in a study, such as missing data, or surveying techniques, may also be a problem. It is very easy to get a misleading picture of the interview process.

One study that is mentioned that seemed to have problems that have not yet been solved. The study is 1999-2000, and the results seem to have been affected by a number of factors. It is not clear if the study was a survey or a case study, and it is not clear if the study was a survey or a case study.
